Mr. Huarte

As you may be aware, the water bill came after it was due and again it did not include any usage charges. Instead, the utility fee has gone up to \$35.06 without explanation. This looks like fraud. Ivan has wanted to simply divide the water charges among the residents he feels should pay since the beginning, but the law requires metering. This is either a way of billing us for the water leaks that haven't been fixed, or it's damage control trying to collect all he can with a failed system. I paid the amount, but this is unacceptable. As of last Friday, I am actively seeking legal representation. The slander and the invasions of privacy have not stopped, and I believe he's even tried to frame me for crimes I didn't commit. Your manager is not just a fear monger, but a crook who refuses to do legitimate business. I think you may also be aware this involves my family and property. This is not a typical landlord/tenant dispute but he has abused his privileges here as landlord and literally follows me around in town calling the police and raising alarms with anyone who might support me. I'm still succeeding. You have a legal obligation to communicate with me, but I have been quintessentially ignored. I'm owed some answers, at the very least. I've spent countless hours pursuing justice legitimately - in writing - and I will be treated with respect. I'm listing your name, Highland View, and the Erdman's for the conflict of interest check and you will surely be informed when I have retained an attorney.
