P.P.S.

One overlooked detail from your settlement offer is that again you have offered only data from 2023 while the discrepancies that prompted this were from the prior Winter and before. There were missing bills, an odd duplicate, and that day a resident here was messing with my meter while Ivan stood with his back turned - I am insisting on the last two years with explanations. I haven't looked at the documents you've offered and I'm not going to bother. Other residents have questioned the rates and the absurdly high utility fee, and this is why the law requires you to make the facility water bills public - it's to keep you honest, because the submetering of the water is not intended to be another source of profit. It seems clear to me that this will have to go before judge. You have not honored my wishes in all these years, and I have only asked that my rights be be respected. Please don't waste my time with anymore whitewash. I want answers and I'm not going to settle for subterfuge. I intend to proceed with the legal process this coming week.
