

Attachments:  
Attn: Matthew Donahue

All of these documents have been mailed or emailed to all involved parties in this case. As per our agreement in court, I served my motion to deny along with a copy of the final demand letter for the amount awarded to the address for David Huarte that was provided to me. Although you were assured that David Huarte would sign as registered agent, he did not. Instead, I received a manila envelope from their lawyer, Mr. Talmadge, sent to the address I use for packages again and not to my home. I haven't even bothered to open it. I have intentionally not contacted Mr. Talmadge because I was never served papers that he would be representing in this particular case and I don't accept it. I ended up in Small Claims because lawyers aren't allowed and that was the only level playing field left for me as an individual. Over the weekend, there were also suspicious circumstances involving Ivan Erdman and I reported this to police – I believe his posturing was related to this case. I see no reason to play a shell game with names and addresses to prove that the defendant was informed, nor do I see the reason for a fake water bill to require a full trial. After this many years of emails and complaints, not to mention court documents, for the defendant to claim he was uninformed is ludicrous. Ignorance is no excuse, anyway. This particular case was the second, citing the same violations of law, and those have continued to this day. In that, the over billing for water is just one part of a much bigger picture. I am leaving this in the hands of the courts and law enforcement now. I probably didn't use the right form for this, but I thought I should submit the Return Receipt and I want to make sure the court has a copy of my last emails regarding Ivan Erdman and this case, 24SC00677. I feel I have done my part in this matter and there are too many other things that need my attention. I am not interested in filling out anymore forms. But as always, I am available for contact.
